Customer Profile: 
Master Gardener

Cooperative Extension conducted a state-wide telephone survey in 2007. In part of the survey, respondents were read a list of topics and were asked to indicate if they were interested in pursuing a given topic area (a) in the next six months (b) in the next year or (c) not at all.

This profile describes respondents who were most interested in this topic. Please note the word “most.” The characteristics listed below are not comprehensive, but represent the subgroup expressing the “most” interest. Only characteristics that reached the level of statistical significance are listed.

Where more than one entry appears below a demographic category, assume the entries are ranked. The highest ranked entry appears first and is followed by the next highest.

Because the Master Gardener program is offered across much of the state, we included them in the name recognition section of the survey.

NAME RECOGNITION
- Very Familiar: 11.34
- Somewhat Familiar: 17.54
- Haven’t Heard of It: 71.12
