Join us at the NC State College of Veterinary Medicine for a day of education and fun!

Saturday, March 6, 2010 from 9 AM - 4 PM

This full day of equine-oriented activities is designed to give kids and teens, ages 9 - 18, a hands-on look at anatomy, physiology, and veterinary care for horses. Participants will be grouped by age and will rotate throughout the school, visiting many different activity stations.

Planned activities include:

- A tour of the large animal hospital
- How to perform a physical exam on your horse (live horse activity)
- A look at equine anatomy in the vet school anatomy lab (skeletons, intestinal models, etc.)
- How to age your horse by his teeth
- Preventative medicine
- Basic lameness (live horse demo)
- Plus many more!

Breakfast and lunch will be provided, as well as a goody bag.
