90th Annual NC Electric Meter School and Grid Technology Conference

Embassy Suites
Kingston Plantation
Myrtle Beach, South Carolina
June 12-16, 2022

Offered by the Office of Professional Development
North Carolina State University, Raleigh, North Carolina
Electricity metering has been in existence for over 100 years. Metering has continued to evolve in functionality and complexity over this period. The NC Meter School has long served the purpose of providing a place where the metering discipline, skills, changes, products, and practices are learned and discussed. The industry has progressed with today’s technology, and metering interfaces have become varied and often directly related to other grid technologies. The NC Electric Meter School and Grid Technology Conference will continue to be current and proactive.
The North Carolina Electric Meter School and Grid Technology Conference includes topics and products related to electric metering and the electrical grid as follows:

**Electricity Metering**
All aspects of metering to include installation, removal, testing, maintenance, and management practices. Examples may include any metering quantity measurement for revenue or other operational purposes.

**Revenue**
Tariffs, rate practices, and other aspects associated with the accurate measurement of electricity. Examples may include any method or equipment to read, record, and/or verify accurate metering.

**Communications**
Remote communications, including many forms and technology options, related to metering and/or other electrical equipment operations. Examples may include metering and other electrical grid hardware that requires communications between devices or from field to host. May also include modems, fiber, cellular, local, or other means of communications media or methods; tools or equipment.

**IT/Computer/Programmable Devices**
Metering and other grid operational/support systems or equipment. Examples may include metering devices and associated equipment to upload/download programs/configurations; diagnostic equipment; and associated tools and methods.

**Security**
Physical, cyber, and data protection options to safeguard the revenue and operational integrity of the electrical system. Examples may include pre- and post-energy tampering security methods and systems.

**Renewable/Alternative Energy**
Metering interfaces to measure power at these different types of facilities. Examples may include solar, wind or other alternative means of generation.

**Generation, Transmission, and Distribution**
Equipment and practices associated with any aspect of the electric grid, including but not limited to AMI (advanced metering infrastructure). Examples may include relay; substation; metered data from generation, transmission, and other distribution/grid management systems.

**Customer Service**
Services or equipment to provide enhanced customer service options for the customer that may be from within the meter or associated metering data, or other services past the meter. Examples may include metering data or pre-pay.
# Table of Contents

General Information ................................................................. 5-6
Registration & Fees ................................................................. 6
Cancellation & Substitution ....................................................... 7
Meter Calibration ................................................................. 7
Banquet ................................................................................. 7
Accommodations ................................................................. 7
Mission & Steering Committee ............................................. 8
About the Tracks ................................................................. 9, 10
Conference Schedule .......................................................... 11-23
Manufacturer Programming Sessions ............................... 24
2022 Program Committee .................................................. 25
Hall of Fame .......................................................................... 27
**Purpose and Mission**

The North Carolina Electric Meter School and Grid Technology Conference provides you with an excellent opportunity to learn all aspects of metering in a school environment. The basic principles are provided for metering personnel with interest in single phase or polyphase equipment.

You will gain valuable exposure to metering applications and the processing of information gathered from metering, presented in advanced and management levels of instruction. Advanced and management level attendees will take away knowledge of problems, resources, and solutions helping to meet the changing environment of the electric industry.

Metering and utility personnel can increase their knowledge of substations and distribution equipment through two tracks. Information will be presented from utility experience as well as vendor perspectives.

Annually, the North Carolina Electric Meter School and Grid Technology Conference brings together meter personnel from the electric utility industry to present important information on common problems, standard practices, procedures, and new technologies. The school is open to any and all persons interested in this opportunity.

**Attention: Professional Engineers**

The North Carolina Electric Meter School and Grid Technology Conference is an approved sponsor of continuing professional competency activities for qualifying North Carolina Professional Engineers and Registered Land Surveyors. Upon course completion, each participant may receive 18 Professional Development Hours (PDHs).

*Note: These PDHs are only for participants with a North Carolina Professional Engineering license. Other states may approve these courses. It is the responsibility of the attendees to check with their respective certifying agencies to see if they will accept this training.*
About the 90th Conference

The 90th Annual North Carolina Electric Meter School and Grid Technology Conference is coordinated by the Office of Professional Development and will take place June 12-16, 2022. All events will be held at the Embassy Suites at Kingston Plantation, Myrtle Beach, SC.

The program committee attempts each year to design the advanced and management tracks so that individuals find it worthwhile and profitable to attend. The conference includes discussions and presentations on metering practices, new equipment, and new developments.

The single phase and polyphase tracks require a calculator with scientific functions. Individuals planning to attend the single phase or polyphase track are also encouraged to bring a copy of the Handbook for Electricity Metering to the school. For information on this publication contact EEI, 202.508.5000.

Registration & Fees

Registration for the School & Conference will be held in the lobby of the Embassy Suites, Myrtle Beach, SC, from 5-7 p.m. on Sunday, June 12; from 8 a.m. to 4 p.m. on Monday and Tuesday, June 13 and 14, and 8 a.m. to noon on Wednesday, June 15.

Early bird registration fee: $520 through May 27
After May 27 and walk-in fee: $620

The registration fee includes the welcome reception on Sunday evening, networking socials and lunches Monday-Wednesday, breaks and continental breakfasts Monday-Thursday.

Single Day: A single day registration fee is available at $370 per person per day (includes lunch on that day, except Thursday).

More Information: For more information or to register online, visit the conference website at go.ncsu.edu/ncems

If you are a person with a disability and desire any assistive devices, services, or other accommodations to participate in this course, please contact the Office of Professional Development at 919.515.2261 or email ContinuingEducation@ncsu.edu to discuss your needs at least 2 weeks in advance of the program.

Cancellation & Substitution

If your plans should change, you may designate a substitute to attend in your place at any time. In the event that you need to cancel your registration, you may do so with a full refund if you inform us by email by May 27. No reimbursement will be made for cancellations made after May 27 or if you fail to attend. Non-paid no shows who registered by phone, fax, internet, or mail will be billed.
Reference Standard Calibration Check
An added benefit is being offered to you during the conference at no additional charge. After registering, and while attending the conference, please stop by the Winchester room reserved by Radian Research/WECO to have your reference standard(s) tested against a Radian NIST traceable 0.01% reference standard. You will receive a printed and/or electronic “Report of Calibration” which provides the accuracy of your standard at all common loading conditions.

If you think you are up to the challenge, test your meter calibration knowledge by taking a fun quiz. In addition, receive a packet explaining the importance of regular calibration of your equipment.

Accommodations
Headquarters for the 2022 North Carolina Electric Meter School and Grid Technology Conference will be:

Embassy Suites Hotel at Kingston Plantation
9800 Queensway Blvd.
Myrtle Beach, SC 29572

Kingston Plantation offers a variety of accommodations. (Lodging is NOT included in the registration fee.) To review the various types of accommodations and to make reservations online, please visit go.ncsu.edu/ncems and click on the Accommodations tab.

After reviewing the options online, if you prefer, you may call 800.876.0010 and mention code CEM for lodging at Embassy Suites, code EMS for Hilton and Royal Palms or code NCM Kingston Plantation to receive special NC Electric Meter School rates. The room block will be released on May 10 unless it fills prior to the release date.

Banquet
A special 90th anniversary banquet for conference participants and their guests will be held on Wednesday evening, June 15 at the Embassy Suites. The banquet is included in the registration fee. Guest tickets are available at $65 each. Youth tickets for those ages 15-18 are available for $37.50 each. Tickets for children up to age 14 are available at no fee. Dress is casual. A social will begin at 6 p.m. followed by the banquet at 7 p.m.

COVID-19 Precautions
Due to COVID-19 precautions, all attendees must wear masks to all classes and events (except when eating and drinking), even if they have been vaccinated. Hand sanitizer stations will be set up in various places. Please refrain from hand shaking & observe social distancing as much as possible. Thank you for your understanding & commitment to safety, a hallmark value of the NC Electric Meter School & Grid Technology Conference for generations.
# General Information

## Steering Committee Mission Statement
To represent the planning committee as a working group with a mission to guide the School, its programs, and its activities in a way deemed appropriate by the planning committee and in the best interest of the North Carolina Electric Meter School and Grid Technology Conference.

## Steering Committee

**Chairperson:** Chad Cooper  
**Vice Chairperson:** Greg Johnson  
**Secretary/Treasurer:** Connie McElroy-Bacon

SINGLE PHASE
The single phase track is designed for the entry-level person. Classes are designed to provide a basis for understanding metering principles, power and to complement the participant’s metering skills gained on the job. Sessions offered cover overviews of a power system, basic math, AC and DC theory, meter testing safety and all areas related to single phase meters. The classes are designed to prepare participants for the next level of classes relating to polyphase meters.

POLYPHASE
The polyphase track is designed for the purpose of providing participants with an overview of the basic information needed to understand polyphase metering. This session covers selection, installation, and maintaining polyphase meters. The session provides training on programming polyphase meters. Participants also will receive training in the selection, use, and maintenance of current and voltage transformers.

ADVANCED
The advanced track includes topics on complex metering theory and concepts, high-end metering applications, power quality, remote metering communication methods and other advanced metering applications, tools and equipment. Individuals that have previous metering experience or education should attend this session.

MANAGEMENT
The management track provides information about the newest technologies, current industry trends, day to day operational issues, as well as updates on new technology implementation projects. This track is ideal for professionals and managers who want to learn more about the metering industry, where it is headed and current challenges.

BASIC SUBSTATION & DISTRIBUTION PRINCIPLES
This track is designed to provide entry-level knowledge of substations and distribution systems. It is ideal for substation personnel with less than two years’ experience or meter technicians who work occasionally in substations. Classes cover the fundamentals of substation construction, proper grounding, electrical layout, and the purpose for typical equipment in a substation. Examples include safety, station power transformers, batteries, circuit breakers, capacitors, switches, voltage regulators, basic communications, metering, and other miscellaneous components found in most substations. Classes are also offered to cover distribution system operation and the various types of equipment used.
ADVANCED SUBSTATION & DISTRIBUTION CONCEPTS

This track is geared towards experienced substation and meter technicians as well as supervisors and managers who maintain, repair, and/or oversee the daily operation of substations. Classes cover advanced calibration, maintenance and repair of station equipment as well as troubleshooting techniques of station components. Included are classes on remote communication controls. SCADA, grounding, oil testing, welding, relays, voltage reduction, security protocols, lightning protection, IEEE and OSHA requirements, AMI equipment, infrared, and high frequency testing. Classes are also offered to cover various distribution system operation methods and techniques, and various types of equipment used.

EMERGING TECHNOLOGIES

The Emerging Technologies Track provides an opportunity to explore how electric metering and the overall electric grid are working together in a variety of ways. New technologies, methods, tools, equipment, and challenges will be discussed. In addition to revenue metering as part of the overall electric grid this session will include a forum for Security, Renewables/Alternative Energy, Communications, IT/Computer/Programmable Devices, and Customer Service issues.
Conference Schedule

Sunday, June 12, 2022

2:00 p.m. Begin Vendor Set-up – Embassy Suites, Kensington Ballroom
5:00–7:00 p.m. Registration – Embassy Suites Lobby
6:00–7:00 p.m. Welcome Reception – Kensington Ballroom

Monday, June 13, 2022

General Session

Presiding: Chad Cooper, Dominion Energy, SC
9:00 a.m. Welcome to the School
Chad Cooper, Dominion Energy, SC
Presentation of Colors
Opening Comments
Connie McElroy-Bacon, Conference Manager, NC State University
9:30 a.m. Welcome from NC State University Continuing Education
Mark Bernhard, Vice Provost, Continuing Education, NC State University
9:45 a.m. Battery/Energy Storage, EV Charging, Demand Side Management
Peter Muhoro, Rappahannock Electric
10:45 a.m. Break
11:00 a.m. Overview FREEDM Systems Center at NC State University
Ken Dulaney, NC State University
12:00 p.m. Lunch
Presiding: Chad Cooper, Dominion Energy, SC
1:00 p.m. What can I do now with all of this data?
Scott Mossbrooks, mPower Innovations
2:30 p.m. Break
2:45 p.m. Single Phase, Polyphase, Advanced, Basic Substation & Distribution, Advanced Substation & Distribution and Emerging Technologies Sessions Begin
2:45 p.m. Visit Vendors, Management Track Participants

### ADVANCED

**Presiding:** Brian Homer, Central Electric Power Cooperative  

8:00 a.m. **Ratio, Burden, Admittance Testing**  
John Williams, TESCO  

8:45 a.m. **Advanced Functional Meter Testing**  
Chad Marcum, Radian Research  

9:30 a.m. **Using Vector Diagrams with Site Testing**  
Steve Hudson, Powermetrix  

10:15 a.m. **Break**  

10:30 a.m. **Theory of AC and DC Meter Testing**  
Tom Lawton, TESCO  

11:15 a.m. **Instrumentation Data - the Meter as a Sensor and Data Logger**  
Bryan Seal, Itron  

12:00 p.m. **Lunch**  

**Presiding:** Mike Corbin, Honeywell  

1:00 p.m. **How to Use Vector Data to Identify Issues**  
Mark Hubbard, Dominion Energy  

1:45 p.m. **Waveshape Analysis**  
Dan Sabin, Schneider Electric  

2:30 p.m. **Break**  

2:45 p.m. **Accuracy Testing of Form 5 Meters**  
Victor Love, Schweitzer Engineering Laboratories  

3:30 p.m. **Visit Vendors**  

4:15 p.m. **Adjourn / Networking Social**  

### MANAGEMENT

**Presiding:** Kenneth McCraw, Duke Energy  

8:00 a.m. **Leveraging AMI System for Municipal Services - From Electric to Sanitary Sewer Overflow**  
Bryan Seal, Itron  

8:45 a.m. **Consideration of Adding AMI to Distribution Transformers**  
John Kretschmar, SAMSCO  

9:30 a.m. **New Challenges in KYZ Pulse Metering with AMI Meters**  
Bill Brayden, Brayden Automation  

10:15 a.m. **Break**  

10:30 a.m. **Benefits of LoRa Communications**  
Randy Austin, Vision Metering, LLC  

11:15 a.m. **Cellular Communications for Utilities**  
Jon Scott, Nighthawk  

12:00 p.m. **Lunch**  

**Presiding:** Eric Bush, NTS  

1:00 p.m. **Monitoring to Reduce Maintenance Costs and Reduce/Prevent Outages**  
Deborah McLeod, Emlogix  

1:45 p.m. **Resources and Strategies for Protecting Revenue, People and Physical Assets - Mitigating Risk and Losses at the Meter and Beyond**  
Steve Diebold, American Casting & Mfg Corp.  

2:30 p.m. **Break**

**SUBSTATION & DISTRIBUTION BASIC**

- **Presiding:** Frank Lopez, GE
- **8:00 a.m.** Introduction to Substation II: Protection
  Court Weathers, Booth & Associates, LLC
- **9:30 a.m.** Introduction to Distribution Reclosing
  Anthony Rahiminejad, Schweitzer Engineering Laboratories
- **10:15 a.m.** Break
- **10:30 a.m.** BCT – What I Should Know?
  Ryan Alkire, GE Instrument Transformers
- **11:15 a.m.** Substation Mathematics
  Brett Cockerham, Schweitzer Engineering Laboratories
- **12:00 p.m.** Lunch
- **Presiding:** Mike Gaston, WESCO
- **1:00 p.m.** Metering in Distribution Applications
  Anthony Rahiminejad, Schweitzer Engineering Laboratories

**SUBSTATION & DISTRIBUTION ADVANCED**

- **Presiding:** Rodney Brown, Dominion
- **8:00 a.m.** Reduce Fault Energy Using Selective Instantaneous Overcurrent Element
  Daniel Gillen, City of Wilson, NC - Wilson Energy
- **8:45 a.m.** Real World Experiences with Real Time Equipment Monitoring
  Joel Valley, PWC of Fayetteville
- **9:30 a.m.** G&W FLISR
  Eric Brandstaedter, G&W
- **10:15 a.m.** Break
- **10:30 a.m.** Application of Retrofit External Bushing CT’s for Metering & Relaying in Substation Applications
  Lee Bingham, Instrument Transformer Equipment Corp.
- **11:15 a.m.** Using High Accuracy, Extended Range CT’s for Solar & Wind Projects - When They Should & Should Not be Used
  David Ward, Instrument Transformer Equipment Corp.
Tuesday (continued)

12:00 p.m.  Lunch

Presiding:  Rick Anderson, Fayetteville PWC, (Retired)

1:00 p.m.  Advanced Regulator Controls with Distributed Energy Resources
            Roger Munay, Eaton

1:45 p.m.  Advanced Recloser Applications
            Roger Munay, Eaton

2:30 p.m.  Break

2:45 p.m.  Substation Asset Management
            Nand Singh, MinMax

3:30 p.m.  More than the Basics of Faulted Circuit Indicators
            William Narshall and Rick Anderson, Smart Grid Solutions

4:15 p.m.  Adjourn / Networking Social

9:30 a.m.  Distributed Intelligence - An Update on Using Local Processing at the Meter
            Bryan Seal, Itron

10:15 a.m.  Break

10:30 a.m.  Electric Vehicle Impacts - Is the Grid Ready?
            Jimmy Woods, Border States Electric

11:15 a.m.  Asset Insights Through Analytics
            Paul Fratellone, TESCO

12:00 p.m.  Lunch

Presiding:  Blake Zorn, L&G

1:00 p.m.  Certifying DC Electric Vehicle Fast Chargers and AC Level Two Chargers
            Iosif Grigoryev or Tom Lawton, TESCO

1:45 p.m.  Advancing Business Process Automation in Field Service Management
            Paul Fratellone, TESCO

2:30 p.m.  Break

2:45 p.m.  Solutions for Protecting Distribution Systems with Solar Farm Installations
            Brett Cockerham, Schweitzer Engineering Laboratories

3:30 p.m.  Distributed Energy Resources (DER)- Trends in the DER Space
            John Steinberger, Itron

4:15 p.m.  Adjourn / Networking Social

Conference Schedule

Wednesday (continued)

**ADVANCED**

Presiding: Jeanne Kretzschmar, SAMSCO

8:00 a.m. **CT Testing: Theory and Practice**
Tom Lawton, TESCO

8:45 a.m. **Sizing Instrument Transformers for Most Accurate Metering Performance**
Ryan Alkire, GE Instrument Transformers

9:30 a.m. **The Benefit of High Accuracy, Extended Range Current Transformers**
Jon Rennie, Peak Demand Inc.

10:15 a.m. Break

10:30 a.m. **Four Quadrant Metering**
Steve Hudson, Powermetrix

11:15 a.m. **High End Intertie Metering**
Joe Ostrowsky, AMETEK

12:00 p.m. Lunch

Presiding: Jeff Lewis, PowerTech, LLC

1:00 p.m. **Dynamic Metering Applications**
Kenson Therrien, Schneider Electric

1:45 p.m. **False Energy Detection**
Victor Love, Schweitzer Engineering Laboratories

2:30 p.m. Break

2:45 p.m. **KYZ Pulse Metering**
Bill Brayden, Brayden Automation/Solid State Instruments

3:30 p.m. **Next Generation Cellular: Navigating Obsolescence and Emerging Technologies**
Michael Coddington, Duke Energy

4:15 p.m. Adjourn

6:00 p.m. Networking Social

7:00 p.m. Banquet

**MANAGEMENT**

Presiding: Phil Dudley, Texas Meter Device

8:00 a.m. **Safety in Field Metering Equipment**
Steve Hudson, Powermetrix

8:45 a.m. **Personal Protective Equipment & Regulatory Compliance Attainment**
Paul Fratellone, TESCO

9:30 a.m. **Meter Asset Management 101**
Chad Marcum, Radian Research

10:15 a.m. Break

10:30 a.m. **21st Century Power Measurements**
Tom Lawton and Bill Hardy, TESCO

11:15 a.m. **Billing vs. Metering Accuracy**
John Jones, Powermetrix

12:00 p.m. Lunch

Wednesday (continued)

**SUBSTATION & DISTRIBUTION ADVANCED**

Presiding: Joel Valley, PWC of Fayetteville

8:00 a.m. **Distribution Substation Optimized Protection & Control Architecture**
Craig Wester, GE Grid Automation

8:45 a.m. **Transformer Condition Assessment**
Bastian Auerbach, Reinhausen Manufacturing Inc.

9:30 a.m. **CCVT Design and Application for Use in Relaying and Revenue Metering**
Chris Zaphiris, Ritz Instrument Transformers

10:15 a.m. Break

10:30 a.m. **How to Leverage Cellular Communication for DTT and POTT Schemes**
Andre Smit, Siemens Industry Inc.

11:15 a.m. **Unlicensed Radio Applications**
Andy Gould, Schweitzer Engineering Laboratories

12:00 p.m. Lunch

Presiding: Dee Byrd, WR Daniel

1:00 p.m. **Distribution Capacitors & Controls Advanced**
Roger Munay, Eaton

1:45 p.m. **Tap Changer Application**
Carlos Bittner, Reinhausen Manufacturing Inc.

2:30 p.m. Break

2:45 p.m. **Reactor Tap Changer Maintenance RMV-II**
Carlos Bittner, Reinhausen Manufacturing Inc.

3:30 p.m. **Digital Transformer Monitoring**
Markus Stank, Reinhausen Manufacturing Inc.

4:15 p.m. Adjourn

6:00 p.m. Networking Social

7:00 p.m. Banquet

**EMERGING TECHNOLOGIES**

Presiding: Raeann Miller, Radian Research

8:00 a.m. **The Future of Edge Computing**
Steve Kenny, Landis + Gyr

8:45 a.m. **Microgrid Power Conversion**
Kyle Farmer or Alan McDonnell, Switchgear Power Systems

9:30 a.m. **Infrastructure Required for Mounting 5G and Other Services on Telephone Poles**
John Williams, TESCO

10:15 a.m. Break

10:30 a.m. **Distribution FLISR Solutions**
Luke Booth, Schweitzer Engineering Laboratories

11:15 a.m. **Shedding a Light on Street-light Meter Testing**
John Williams, TESCO

Thursday, June 16, 2022

**SINGLE PHASE**
Presiding: Steve Wright, Itron
8:00 a.m. **Meter Safety**
John Kretzschmar, SAMSCO
9:00 a.m. **Instrument Transformer Basics**
Roger Lapay, ABB
10:00 a.m. **Meter Testing Residential Sites**
Ryan Roth, Radian Research
10:45 a.m. **Break**
11:15 a.m. All Sessions Combine into General Session

**POLYPHASE**
Presiding: Tina Pampanelli, Itron
8:00 a.m. **Loss Compensation Application and Verification**
Nathaniel Dunn, Schneider Electric
9:00 a.m. **Introduction to Vector Diagrams**
Phil Fischbach, Powermetrix
10:00 a.m. **Break**
10:15 a.m. **Theory of AC and DC Meter Testing**
Tom Lawton, TESCO
11:15 a.m. All Sessions Combine into General Session

**ADVANCED/ MANAGEMENT/ EMERGING TECHNOLOGIES COMBINED SESSION**
Presiding: Dee Byrd, WR Daniel
8:00 a.m. **Metering, Operations and Utilities: 2022 and Beyond**
Tom Lawton, TESCO
8:45 a.m. **Anatomy of a Cyberattack and Ways to Prevent It**
Steve Lindsay, XTec, Inc.
9:30 a.m. **Power Distribution for EV Charging**
Jack Hackathorn, Milbank Manufacturing
10:15 a.m. **EV Charging Range of Installations and Rate Structures**
Bill Jordan & Stephanie Beaurgard, Booth & Associates, LLC
11:00 a.m. **Break**
11:15 a.m. All Sessions Combine into General Session
**Thursday (continued)**

**SUBSTATION & DISTRIBUTION BASIC**

Presiding: Curtis Craig, Shenandoah Valley Electric, (Retired)

8:00 a.m. **Triple Single Line Device Training**
Kevin Clark, Blue Ridge Energy

8:45 a.m. **Fault Circuit Indicator Applications**
Anthony Rahiminejad, Schweitzer Engineering Laboratories

9:30 a.m. **Environmental Permitting**
Briana Eddy, Booth & Associates, LLC

10:15 a.m. **Introduction to DNP3**
Andy Gould, Schweitzer Engineering Laboratories

11:00 a.m. **Break**

11:15 a.m. **All Sessions Combine into General Session**

**SUBSTATION & DISTRIBUTION ADVANCED**

Presiding: Mike Doggett, Chapman Co.

8:00 a.m. **Substation Grounding Design**
Byron Johnson, Booth & Associates, LLC

8:45 a.m. **Properly Sizing Distribution Transformers**
Bill Jordan, Booth & Associates, LLC

9:30 a.m. **DER Protection & Control Challenges**
Derrick Wood, Booth & Associates, LLC

10:15 a.m. **SCADA and Outage Management Systems (OMS) Integration**
Jim Baehr, QEI

11:00 a.m. **Break**

11:15 a.m. **All Sessions Combine into General Session**

**EMERGING TECHNOLOGIES**

Combined Session
(See Advanced/Management/Emerging Technologies Sessions Agenda on page 22 after ADVANCED.)

---

**General Session**

Presiding: Chad Cooper, Dominion Energy

11:15 a.m. **FR and Arc Flash Protection**
Shawn Norolk, MCR Safety

12:00 p.m. **Participant Feedback on the School**

Closing Comments/Door Prizes

Adjourn
### Manufacturer Programming Sessions
