2:45 Break and Networking
**Session Descriptions**

**LED Lighting Panel**
LED lighting has made tremendous inroads in the marketplace over the past several years, have come down in price and have saved significant amounts of money in reduced energy and maintenance bills. However, as with any new technology, there are growing pains. This panel will discuss the issues experienced and solutions contained in a guidance document being prepared for using LED lights in North Carolina State buildings.

**Bridging the Gap – How to Win Informal Contracts with State Government Agencies (parts I & II)**
This panel will provide guidelines on how to become informed on informal state construction projects. The panel will be made up of a Prime, CPC and PM. The subtopics will focus on outreach, pre-bid meetings, etc. The goal of this panel is to engage in dialogue on strategy and education.

**Third Party Approval**
An overview of North Carolina’s Third Party listing and labeling requirements, including what to look for and why it’s so important.

**Asbestos Hazard Management Program**
This session will provide information on prevention of and health effects resulting from exposure to asbestos.

**Update on Legal Developments in State Construction Contracting**
This session will focus on some of the legal issues and challenges relating to: the new project delivery methods of Design-Build, Design-Build Bridging, Public-Private Partnerships; understanding the minimum insurance requirements in Article 34 of the State’s General Conditions (SCO Form OC-15); and understanding the contractual and potential legal implications of new definitions and Articles added to State’s General Conditions Change Orders (OC-15) in 2013.

**Construction Site Safety**
Construction is a high hazard industry that comprises a wide range of activities involving construction, alteration, and/or repair. The information provided in this session is designed to assist those in the industry - whether worker or employer - to identify, reduce, and eliminate construction-related hazards.

**Elevator Inspections**
This session will focus on review of how elevator inspections should be performed, including how to have a successful inspection and how to prevent failing an inspection.

**Lead Based Paint Hazard Management Program**
This session will provide information on prevention of and health effects resulting from exposure to lead based paint.
