# **The Alma Mater**

*Words by Alvin M. Fountain, '23*

*Music by Bonnie F. Norris, '23*

**Where the winds of Dixie softly blow  
O'er the fields of Caroline,**

**There stands ever cherished NC State,  
As thy honored shrine.**

**So lift your voices; loudly sing  
From hill to oceanside!**

**Our hearts ever hold you, NC State,  
In the folds of our love and pride.**

# Alexander Quarles Holladay

## Medal Recipients for 2007

**H. Lee Allen Jr., C.A. Schenck Distinguished Professor of Forestry and Environmental Resources**

Professor Lee Allen has served NC State University for 29 years. He assumed the directorship of the Forest Fertilization Cooperative in 1981, which under his leadership became the internationally recognized Forest Nutrition Cooperative, a teaching, research and service partnership between NC State, Virginia Tech, and the University of Concepcion (Chile) and 38 commercial and public forestry interests across the southern U.S. and in Latin America with 24 million acres of forest plantations under management. Professor Allen's research on sustainable production and silviculture, ecophysiology of trees, and genetic differences in resource acquisition and use has yielded over 240 research publications and millions of dollars in research funding. He has supervised 18 Ph.D. and 35 M.S. students (including 26 international students), who now hold influential positions around the world. He has delivered workshops to over 3,500 foresters and forest land owners. His service to the Southern forestry industry has increased its competitiveness, resulting in an estimated 15 million more tons of wood and \$400 million in additional value annually. He is a member of NC State's Academy of Outstanding Teachers, a recipient of an Outstanding Extension Service Award and Outstanding Teacher Award, and has received a USDA Forest Service Certificate of Appreciation.

**Ruben G. Carbonell, Frank Hawkins Kenan Distinguished Professor of Chemical and Biomolecular Engineering**

Professor Ruben Carbonell has devoted 23 years to research, teaching, service, and administration at NC State. Since 1999, he has been Director of the William R. Kenan, Jr. Institute for Engineering, Technology, and Science. He established the highly successful Kenan Fellows for Curriculum and Leadership Program, which has become a national model for university K-12 outreach. Also since 1999, he has co-directed the NSF Science and Technology Center for Environmentally Responsible Solvents and Processes, which was created by a National

Science Foundation grant that was the largest ever received by the UNC system at the time of the award. He also served as Department Head of the Department of Chemical and Biomolecular Engineering for five years. Professor Carbonell's research has resulted in over 190 publications, 22 patents, and over \$22 million in research funding. He has advised over 70 M.S. and Ph.D. students and 33 postdoctoral students and visiting faculty. His recent work in bioseparations led to the identification of a specific ligand for the prion protein responsible for mad cow disease in humans. This ligand is being used to remove prion protein from blood products. He is a Fellow of the American Institute of Chemical Engineers and a recipient of a number of teaching and research awards, including NC State's Alumni Distinguished Graduate Professorship.

### **Todd R. Klaenhammer, Distinguished University Professor and William Neal Reynolds Professor of Food Science**

Professor Todd Klaenhammer has served NC State for over 28 years. He has pioneered the industrial application of molecular genetics to dairy lactic acid bacteria, research that has led to 170 research articles, 32 book chapters, 201 abstracts, 12 patents, and over \$16 million in research funding. He has supervised 40 M.S. and Ph.D. students, six of whom received the prestigious Kenneth R. Keller Award for the outstanding Ph.D. dissertation of the year in the College of Agriculture and Life Sciences. He has taught a number of courses in the areas of food, dairy

and fermentation microbiology, with special emphasis on the application of molecular biology and genomics to practical issues facing the food and dairy industries. He has presented 165 invited seminars, the majority to national and international audiences. In 2006, he was recognized as a Distinguished Lecturer by Sigma Xi, The Scientific Research Society, and speaks frequently on the topic of "Eat Bacteria-Get Cultured: New Horizons in Bioprocessing and Health." His novel and significant scientific contributions in the areas of food science and microbiology have resulted in his receiving 18 research awards and teaching distinctions, including Alumni Distinguished Graduate Professor and as a Fellow in the Institute of Food Technologists, the American Academy of Microbiology, and the American Dairy Science Association. In 2001, he was elected to the National Academy of Sciences.

**Walt Wolfram, William C. Friday Distinguished Professor of English**

Professor Walt Wolfram has served NC State for 15 years. He is an internationally recognized pioneer in sociolinguistics and dialect study. The graduate program in sociolinguistics that he developed at NC State is now rated as one of the top programs in the world. His research program in language variation studies has been supported by 14 externally funded research grants, including continuous funding from the National Science Foundation for more than \$1.5 million. He has developed an outreach program on language diversity in North

Carolina that has become an international model for sociolinguistic engagement and the dissemination of knowledge in the public sector, including the production of several award-winning TV documentaries, museum exhibits, and dialect awareness curricula. During his tenure at NC State, Professor Wolfram has authored or co-authored nine books, edited or co-edited four books, and published more than 125 articles in professional journals and book collections. He has served as President of the Linguistic Society of America, the American Dialect Society, and the Southeastern Conference on Linguistics, and was inducted into the inaugural class of Fellows of the Linguistic Society of America. University honors include an Alumni Association Distinguished Graduate Professorship and the Alumni Association Outstanding Research Award. He served on the National Advisory Panel for the Linguistics Program at the National Science Foundation and the Council for the International Exchange of Scholars for the Linguistics Program.

## Academic Costume

Academic gowns represent a tradition handed down from the universities of the Middle Ages. These institutions were founded by the Church; the students, being clerics, were obliged to wear the prescribed gowns at all times. Round caps later became square mortarboards; the hoods, originally cowls attached to the gowns, could be slipped over the head for warmth.

Many European universities have distinctive caps and gowns which are different from those commonly used in this country. Some of the gowns are of bright colors and some are embellished with fur. A number of these may be noted in the procession.

The usual color for academic gowns in the United States is black. The bachelor's gown is worn closed; the master's and doctor's may be worn open or closed. The shape of the sleeve is the distinguishing mark of the gown: bachelor – long pointed sleeves; master – oblong, square cut in the back with an arc cut away in front; doctor – bell shaped.

Caps are black. The tassels for the Ph.D. degree are gold and those for other graduate and professional degrees may be of the color corresponding to the trimmings on the hoods.

Of all the components of the academic costume, the hood bears the heaviest symbolic burden. The hood must make clear the level of the degree, the faculty in which it was given, and the institution which awarded it. The level of the degree is shown by the size of the hood, the width of the velvet trimming, and in the case of doctors, by the shape. The bachelor's, master's, and doctor's hoods are three feet, three and one-half feet, and four feet long, respectively. The velvet trimming in the same order is two, three, and five inches and extends all around the hood on the exposed edge. This same trimming identifies the faculty in which the degree was awarded. For each faculty there is a corresponding color; so a glance at the trimming is all that is needed to identify the faculty. A partial list of the colors follows: Agriculture, maize; Architecture and Art, brown; Science, golden yellow; Economics, copper; Religion, scarlet; Speech, silver gray; Veterinary Medicine, gray; Textiles, wine red. The following faculties have the same color – dark blue: Anthropology, History, Languages, Literature, Philosophy, Political Science, and Sociology.
